Active U.S. Security Clearance: SECRET

EDUCATION

University of Maryland, College Park — B.S. Computer Science

Expected May 2028

Minor: Chinese Language · GPA: 3.58 · Dean's List · SAT 1530

College Park, MD

- **Relevant Coursework:** Object-Oriented Programming I/II, Intro to Computer Systems, Discrete Structures, Linear Algebra, Calculus III; **Upcoming Next Semester:** Organization of Programming Languages, Algorithms

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, R, C#, GDScript

Web & Frameworks: React, Vite, HTML/CSS/JSX, Qt, Tkinter, .NET

Cloud, Data & AI: AWS (DynamoDB, CloudWatch, boto3), SQL, data pipelines, real-time data integration, LLM APIs (Google Gemini), multithreaded backends

Tools & Other: Git, LaTeX, psutil, Linux, Microsoft Office, Data Structures

RELEVANT EXPERIENCE

Software Engineering Intern — ASRC Federal / NAWCWD

May – Aug 2026

China Lake, CA

- Building a GUI application that ingests live sensor data and drives pan-and-tilt systems, streamlining real-time data processing
- Supporting test operations on the largest NAVAIR land range (~1.1 million acres), doing site work even in remote ranges
- Using RFID data against topographical maps to identify optimal dish placements, aiding customer data integrity and increasing range connectivity
- Operating across classified and unclassified environments, handling sensitive information under strict security protocols and lab settings

Data Analysis Intern — George Mason University

Apr – Aug 2024

Fairfax, VA

- Selected from the top 10% of applicants to analyze 600+ open-source projects using Python, R, and SQL
- Built and curated the underlying dataset and co-authored a published research abstract on the relationship between open-source business models and project longevity

PROJECTS

BetterTaskManager — Python, AWS

- Built a system task manager with a multithreaded Python backend that filters several hundred to several thousand active processes by name, filepath, or PID
- Implemented real-time monitoring with in-memory tracking of the most resource-intensive processes
- Integrated AWS DynamoDB to persist custom metrics across sessions

Conversational AI Assistant — Python, LLM (Gemini API)

- Built a terminal-based conversational assistant on Google's Gemini LLM API with persistent conversation memory across turns; developed through UMD ACM

Personal Portfolio Website — JavaScript, React

- Built and deployed a personal portfolio site with React + Vite, featuring an integrated resume download and project showcase on GitHub Pages

Historical Game Development — GDScript, Godot

- Designed and built a 2D arcade-style game in Godot using an agile workflow; presented the finished project to industry professionals

LEADERSHIP

Tutor — Academies of Loudoun CS Honor Society

2023 – 2025

- Organized innovation days and community events; led hands-on activities engaging hundreds of K–8 students in computer science and robotics

Front Ensemble Section Leader — Rock Ridge HS Marching Band

2021 – 2024

- Mentored the section to 3 first-place finishes and a percussion title; helped raise \$10,000
